It is nice.. Delivers what it promises, and does it good.. I biggest, glaring flaw with this game is that the series has been indefinitely post-poned. A real shame - the first two instalment were fantastic fun.. this is fun ... :D „works just nice on me PC. it be like „how the h*** am i gonna make that one.*level..

i might fail at first go,, still i get it next turn again and again. :)

passed first 20 level with 60 stars. and onto 18 levels on next „soo close to halfway,, i properly gonna complete this game if it be up to me and me skillz „, soo for pure tactical fun ,relaxed music cool colorful graffic and nice prize..i recomend this easy. as a good game.

there 240 Stars complete „, game was a fun challange.. with very cool nice grafficl,, sweet.

with some practise u easy get what shot u want..

only 2 tiny issue i had,, been „it starts in window/fullscreen. inbetween bouth :)

but get fullscreen when i lay game down to line and up again..so no big deal.

2th issue „be 3 last entry to game,, and i end game,,it still be online to me Steam profile,,

and a task „, sins i had to turn off/on Steam to end it...true ctrl alt delete and

not reg way,,sins Steams tell me i have to turn off StayAlight (properly a Steam error.)

*and did not happen last time properly because i window, game ,before i end it.

and me gameplay time be about 10hrs shorter, ,, this was FUNNY good gameing.

with only use of mouse,, more relaxing „, then most me other type gameplay.... tumbs up. A awesome game that i really enjoyed playing when it was playable. The game is pretty much dead. My sugestion would be make the game free so everyone could play. but besides that fact its an awesome game that i enjoy and wish to play again (with a full lobby). When you are on Multiplayer, trench warfare is probably the most intense and emersfull way of playing.. I played this game first before steam even existed it is better than the first on graphics an enjoyable game.. Graphics freeze constantly on my machine. Game continues working but nothing changes on screen so it's unplayable. Got an hour and a bit on my initial playing of the game and no more then 10 minute stretches after that.. 10/10 - Would send 30 Infantry Sections over the top and into the German Base again

I have played all the Milestone motorcycle games and with no doubt I must say that its the moste mature, best polished and most enjoyable their game to this date. Still its not without things I dislike but I can truly recomend it.

Honestly I have never been riding on a MX bike but finally in this game physics are good, challenging, and it needs time to understand how to handle the bike. Front tire still has way too much grip (I really dont understand why Milestone is always making so unrealistic front tire grip) but finally in some situations you can flip the bike over or lowside. Riding is not about stupid full throttle, its easy to loose rear grip or fall. Rigs and track line are very important.

Finally bike set iu is nicely made and proper bike set up give advantage. Like in MXGP 3 or MSX the graphics are fantastic (but still blurry), better animation, fantastic mud effect ant track deformation...but...still the rain look weird (not as bad as MXGP3). Unfortunately to fully enjoy you need very strong pc as I was able to play MXGP3 @60 FPS with full settings, now I hardly ever get 40fps.

Its a big shame that if you bought MXGP3 you will fell that this game is "just" very upgraded version, but finally Milestone released a good game I really find it hard to complain about anything. Of course there are things that should be upgraded/added and despite writing about it many times it wasn't implemented. So again, my suggestions are:

- more realistic front tire grip
- changable Field Of View for onboard camreas
- dynamic onboard camera allowing to look into apex or head movement depending on the rider lean
- compound riding in multiplaye mode
- sharp filter for graphics options

In short version:

PROS:

- good, challanging physics (but yet too much grip for front tire)
- beautiful graphics, animations, track deformations
- enjoyable gameplay
- nice career mode with extreme option
- big customisation
- working set up of the bike
- traning mode with echievements
- fantastic compound
- great sounds

CONS:

- very strong pc needed to use full gfx settings
- too much front tire grip
- annoying respawn when leaving track limits, in some cases instant respawn.
- too short respawn time after crash
- no compound in multiplayer mode.. Fine for a wee mess about. Get it when its on the cheap. 2 player also.. This game is actualy great! It is not pay to win, not bought a thing, and usualy wipe the floor with those who have payed for anything. Yes it might have some translation issues, but that is all. Gameplay is fun also, an if you are able to think like chess then you will have no time in leveling fast!. This funny game needs to be fixed. It's a shame that is dying.. This game is from like 1999. That being said. Probably the largest time sink of a game I have ever played. I mean I've got games where I've played over 1000 hours. That's nothing compared with how much time I've spent in this game. I actually left it playing over night on full speed once. I got to the year 2307. Yeah that's how much I play this game. I still haven't completed the campaign though. I'm in no rush. Besides, I love the sandbox. I like not being restricted by any goals. All in all though This is the game I've spent the most time playing in my life. 5 out of 5 stars.. I'd got to start off by admitting, I've played a lot of games in this tone and style but this one has the weirdest twist than anything else I've ever played and I've played a lot of weird games. As for the game over all; it is interesting and a lot of fun. The mechanics are interesting and play upon the theme of the game very well. Though there isn't much set story it is still intriguing as you explore the levels and "characters" found within the game. Over all this game was lots of fun and I would recommend for something new to try!. If you want a new Sega Rally, then that is your game!. in my top 10 games of all time. The store page says coop not local coop... the description doesnt say it is on one computer coop... the game has deathmatch mode online so wtf couldnt they do the campaing coop online????!!!

The Coop is local only and it plays horrible as the game is best played with keyboard and mouse and in local coop only one player can do that, the other is bound for gamepad, and it is not even half as good as keyboard + mouse.

dont waste your time with this piece of garbage
